## STRATEGIES AND TECHNOLOGIES TO PROTECT YOUR BUSINESS

Presented by **GENE MARKS**

Currently a \$1.5 trillion market, the cyber crime economy continues to grow. Is your business prepared with the security it needs to protect against a cyber attack? In 2022, the workforce is more virtual than ever, making cybersecurity a priority for every business. Join nationally recognized journalist, best-selling author, and business owner Gene Marks CPA for a fast paced, entertaining and data filled presentation where he will share with you advice, lessons and actions to position your company for security in the years to come.

### During this lively presentation Gene will cover the following topics:

- ✓ A look at how cybersecurity has changed during the pandemic and why cyber attacks are increasingly on the rise.
- ✓ The biggest and latest threats in 2022 that business owners are facing in this new hybrid, virtual world such as ransomware, phishing/ SMiShing, Internet of Things, and reputation implications.
- ✓ How business owners can protect themselves, their business, and employees through training, security software, password management, multi-factor authentication, backups, VPN, managed services providers, and operating system upgrades.
- ✓ The importance of employee training: The biggest cause of data breaches and malware attacks is employee error. And the biggest reason why so many employees are making errors is because they're not satisfactorily trained.
- ✓ The new and latest software technologies that your business can begin implementing and investing in today to ensure security for your entire business for the future.
- ✓ Workspace collaboration tools to migrate and manage all your business data in one secure place and more.
